

Notice to General Transport Operators

To: Appleton Dock & Webb Dock West General Transport Operators

Date: 06^d March 2019

Reference: Truck Cargo Loading Dunnage

Australian Amalgamated Terminals (AAT) advises that any truck that presents at Appleton to collect a shipment without appropriate or sufficient dunnage to support the intended cargo will not be loaded.

The intent is to ensure that cargo can be safely deployed and supported on the truck ensuring a minimization of personal risk and nil damage to cargo.

Further to this all drivers/spotters are to remain within their allocated exclusion zone while loading is taking place. AAT forklift drivers will explain the expected exclusion zone protocol and all drivers/spotters must adhere to exclusion zone procedure.

Please contact me on 03 8698 6930 or andrey.alekseev@aaterminals.com.au if you require any further clarification.

Regards,

Andrey Alekseev

Operations Superintendent
Appleton Dock
